

Measured all 8 of my good IZH magazines

Kicker lips: Front

Front avg.= .226" middle of kicker lips measurement.

There is a slight taper from the front part, measuring from .223-.225", lowest measurement (near bullet tip) to .226-.229" near the center of the magazine.

Feed lips: Rear

Rear avg. = .190" middle of lip measurement.

Fairly straight, no real taper

This was done free-hand with a dial caliper.
